Company Description

Removing Company is a healthcare innovator combining AI-driven body analysis with tailored exercise solutions. We specialize in personalized rehabilitation and strengthening programs, catering to individuals 50+ and beyond. Our mission is to foster growth, trust, and health innovation through cutting-edge technology and exceptional care, driving impactful changes in wellness.

Product

Motionary

Function and Usage

Motionary is an AI-driven device that analyzes movement and the musculoskeletal system, offering precise insights for physical health. Incorporating BHQ's advanced technology, it also assesses brain health, making it an essential tool for proactive senior wellness. Designed to support rehabilitation, fitness planning, and preventive care, Motionary empowers health professionals and individuals with data-driven solutions to improve mobility, monitor cognitive health, and enhance overall quality of life.

Marketing and Selling points

Motionary redefines health assessment with its dual focus on physical and brain health. Powered by AI, it delivers precise musculoskeletal analysis, identifying movement patterns and potential risks. With BHQ's brain health technology, it provides a holistic approach to senior wellness, addressing both body and mind. Ideal for rehabilitation, preventive care, and fitness planning, Motionary offers actionable insights to professionals and individuals alike. Its cutting-edge design ensures reliable, user-friendly solutions to achieve healthier, more active lifestyles.

BHQ

Function and Usage

BHQ (Brain Health Quotient) analyzes facial expressions using AI to assess mental and emotional states such as stress, fatigue, and cognitive balance. It provides objective brain health indicators for preventive care, wellness management, and population health monitoring across healthcare, corporate, and public sectors.

Marketing and Selling points

A low-cost, preventive alternative to MRI for brain health screening. BHQ enables frequent, non-invasive monitoring of stress and cognitive fatigue, supporting early detection and proactive care without expensive imaging or clinical burden.
