Company Description

Our company develops and researches XR devices and AR glasses. We specialize in LCoS (Liquid Crystal on Silicon) micro displays.

Product

0.389 inch LCoS Micro Display(SLM Target)

Function and Usage

XR device and AR glass parts (Display target)

Core element of optical modulation phase device (SLM Target)

Marketing and Selling points

We can customize it to suit the customer, select the desired Active Area, and manufacture it.

In addition, we are producing it targeting SLM (Spatial Light Modulator).
